

# SpoolFactory - Spool Converter Pro

Spool Conversion Software for i5/iSeries/AS400

## The power of electronic documents

- The distribution of information by electronic means has become something habitual and necessary
- The evolution has gone from paper to electronic formats like e-mail and publication on the Web
- Spool Converter Pro can help to modernize your reports obtaining a visual appearance similar to the graphical environments

**1** Software description

**2** Software Architecture

**3** Main available formats

**4** Features for PDF format

**5** Sample PDF reports

- **Spool Converter Pro converts \*SCS spool files to:**
  - PDF, HTML, TXT, CSV, XML, Excel
- **Design forms to apply to the spool for PDF documents**
  - By using transformation and mapping rules to apply to the reports
- **All the conversion is performed in native mode**
  - No external servers required
- **Two available modes**
  - User mode – Spool Manager
  - Command Mode – for Software Integration
- **Right-to-Left languages are supported** (Arabic and Hebrew)

# Software description

## Fast software installation

- Save file available for downloading
- Restore the objects and start to use the software

## Easy learning

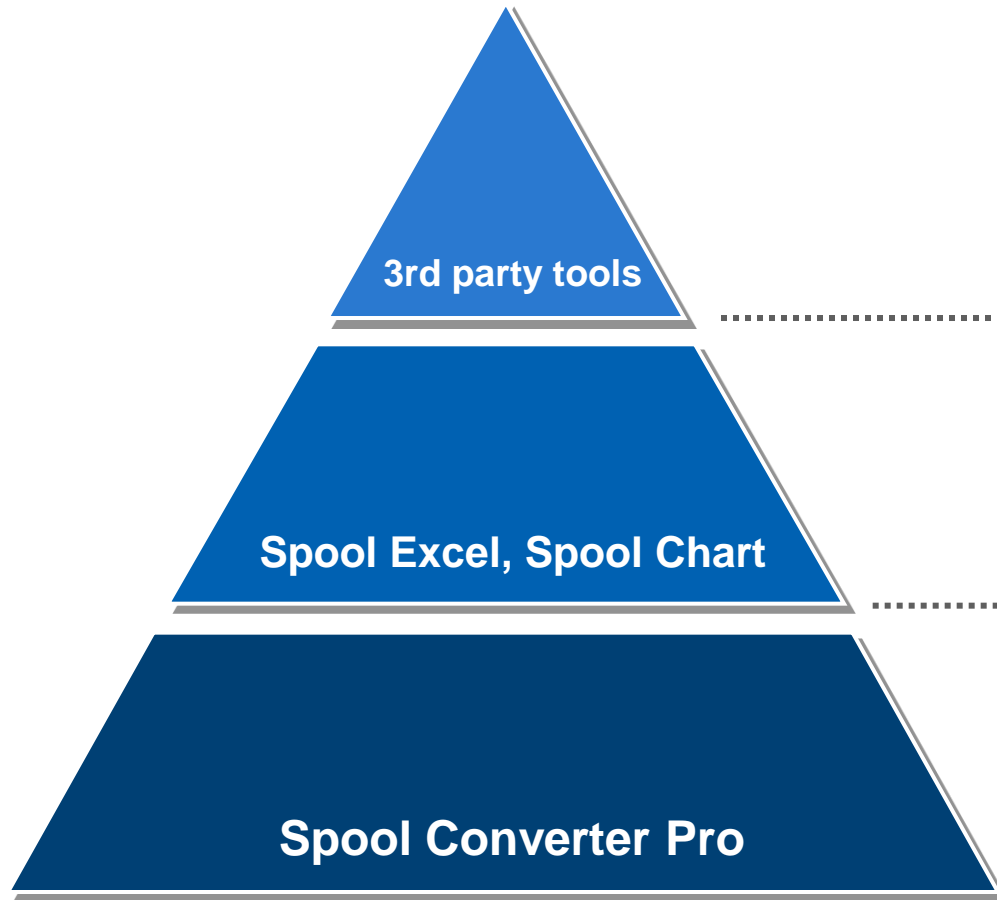

- For non-technical users, Spool Manager is the interface to convert the spool files

## OS400 or i5/OS

- The whole conversion process is entirely done in native mode
  - Images can be added to the image catalogue in the System i environment with a supplied and easy to use tool

## Command mode for developers

- Command mode allows to call the converter from CL programs
  - After spool conversion, it is possible to call a user program to execute other actions with the generated file

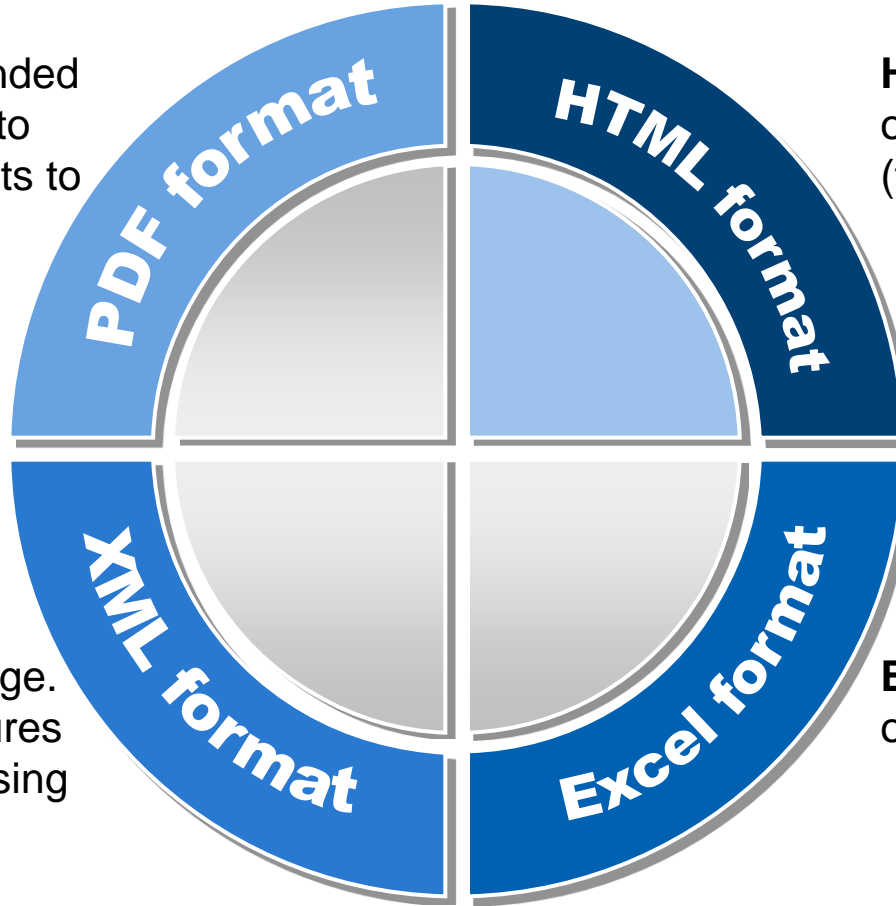

- Integration with other vendor tools
- Command implementations based on features of Spool Converter Pro
- The conversion suite developed natively for OS400

# Main available formats

**PDF** is the most demanded format, with the option to apply graphical elements to the report

**HTML** format has the option to apply design (text color)

For information exchange. Include advanced features for multi-record processing

**Excel** format is based on XML for Excel 2003

# Features for PDF format

Main Features	Other features	Experimental features
