

Spool Converter Pro – Success Story

Kuhn Holding (The Netherlands)

Kuhn Holding specialises in the purchase, production, sale, marketing and distribution of wood products. These products are sold to the woodworking industry, professional traders, DIY chains and garden centres in Europe.

“The factor that binds all the facets of our holding company together is wood. Kuhn Holding specialises in the purchase, production, sale, marketing and distribution of wood products. These products are sold to the woodworking industry, professional traders, DIY chains and garden centres in Europe.”

In order to improve the appearance of the reporting (invoices and internal reports) they looked for iSeries/AS400 software capable to offer the needed functionality, with the requirement that the software should be very easy to use to avoid any learning curve that could delay the final implementation.

SpoolFactory software has allowed us the integration with our existing processes and we are able to automate the output management.

KUHN HOLDING

In words of Mr Ronny Vergracht, responsible of Kuhn Holding IT team, about SpoolFactory collaboration:

“SpoolFactory has improved our reporting system allowing us to design our reports with graphics elements and all in native mode, without the use of external servers.

The software has changed the perception of our users about what an iSeries/AS400 is able to produce. We mainly use the generated pdfs for internal use and archiving.

Having the option to convert our Business Intelligent reports to Excel is a plus.”
